MOVEMENTS OF PRICES WITHIN NARROW LINES

Foreign Markets Continue to Reflect Uncertainty Over Finance and Politics.

Recent indication of the market's underlying firmness and of the scarcity of stocks gave traders on the long side more confidence, and the street was full of "bull tips" on some of the more conspicuous speculative mediums.

Foreign Selling.

The foreign markets continued to reflect uncertainty over the financial and political outlook, and bears expected assistance in the way of selling from abroad. Berlin sold Canadian Pacific moderately on direct orders and Paris unloaded low-priced coppers, but the total of for-

eign selling was not large. Bear traders. disappointed in this respect, soon abanfoned their attack on the list. Following the opening decline and the subsequent recovery, on both of which movements few stocks fluctuated as much as a point, the market was maintained on a dead level during the re-mainder of the forenoon. Bonds were steady.

Resiliency is Evident.
